

MEED names national award winners

16th January 2011 - MEED names Meydan City Corporation, substations at the Nad Al-Sheba race track which was built by Emirates Electrical Engineering (EEE), a member of Al Rostamani Group, as the Winner of the National Quality Award for Power & Water Desalination.

MEED is the premier source for business intelligence in the Middle East, a trusted and widely respected platform for accuracy and analysis.

The MEED Quality Awards for Projects reflects this integrity with a multinational merit-based approach to benchmarking best-practice across multi-sector projects in the region.

This award will promote and celebrate values that embrace quality in the built environment, covering engineering, construction and project management.

This event, which is the first of its kind in the Middle East, is based purely on the quality of its entrants. Winners will be regarded as being the best of the best in the region.

Projects nominated for MEED Quality Awards were required to demonstrate excellence in economic and social master-planning, architecture and design, as well as engineering, construction and sustainability. The winners of the national awards have been recommended by members of the MEED Quality Awards Projects judging panel.
